Assignment 4

CS321 Winter 2023, Professor Christopher Diggins

Consider the Notepad.exe program. Describe five features in such a way that a programmer can implement them without asking questions.

Bonus:

Imagine that as a programmer and you must implement the Notepad.exe program from scratch. How might you group the functionality you have to implement into different libraries?

Submission:

- Feature descriptions in Word .docx format
- Modular components

Grading

5 points: effectively describe five features of the notepad.exe program

Bonsu 2 points: describe at least five different modules that cover major functional areas of the software
